

Norpass2 Access Control Management Software

PRODUCT DESCRIPTION

Norpass2 is a flexible, fully integrated security management system that is easy to use. Doors, turnstiles, car parking barriers, bollards and all other points of entry and exit may be managed from a single PC. Clear and easily understood screens allow instant updating of security arrangements and the control of access to each managed area. Individual cards can be rapidly programmed to enable each cardholder to have access only to those restricted areas that correspond to their status and responsibilities. Furthermore, the time that they can gain access to those areas can also be restricted.

Features

- ◆ Simple system set-up and administration
- ◆ Real time event logging
- ◆ Real time system management
- ◆ Single or batch card enrolment/modification
- ◆ Remote management of all controller features
- ◆ Definable user privileges per menu item
- ◆ Remote system management via integral web server
- ◆ Full historical reporting
- ◆ Comprehensive report generation
- ◆ Roll Call/ Muster options
- ◆ Powerful database sort and filter functions
- ◆ On-screen user location display
- ◆ Configurable access levels & time zones
- ◆ Automatic door open time zones
- ◆ Integral badge printing with template design
- ◆ Picture pop-up option
- ◆ System customisation possible
- ◆ Remote, individual door override
- ◆ Open and close all doors commands
- ◆ Group counting with on-screen display & alarm feature

Technical Specifications

PC Platform	Windows XP & Vista compatible	Number of Time Zones	16
Number of cards	Up to 65,000	Number of Access Levels	16
Number of readers	Up to 64 with 32 controllers	Communication Options	USB/TCP/RS232

CRC220

The CRC220 is a compact 2-door access controller with free exit, anti-passback, anti-timeback, anti-tamper and local alarm output.

With a local database of up to 65,000 card capacity plus event report storage, it is the ideal door controller to link to the advanced access management features of Norpass2.

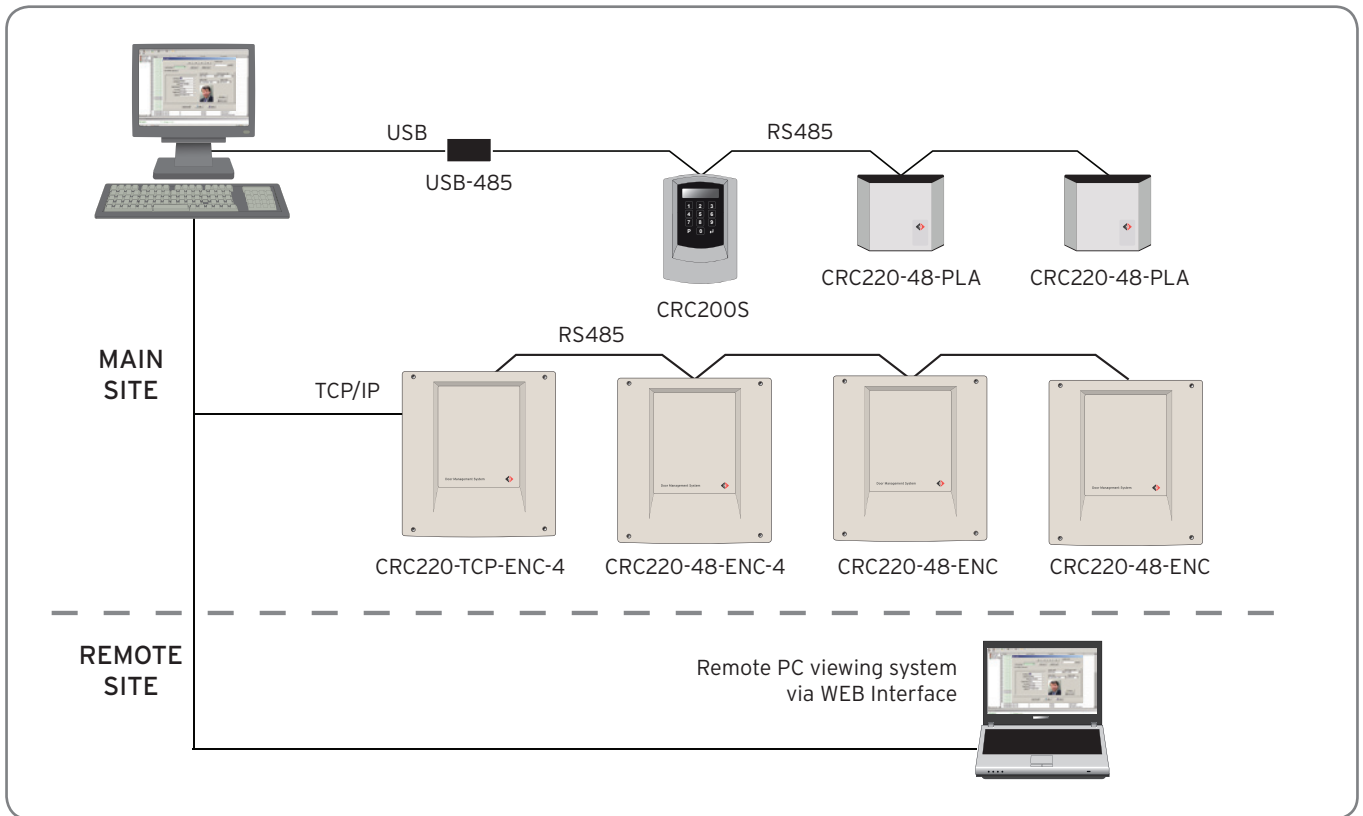

The CRC220 supports TCP/IP or RS485 connectivity.

CRC220 Network Controller

Norpass2 Access Control Management Software

Norpass2 Network Structure

Software Modules

Norpass2 Muster

Additional muster (roll call) module. Allows predetermined Roll Call report to be generated showing who is on site & who has reported to a muster point.

Norpass2 T&A

Additional Time & Attendance module to enable calculations based on individuals or groups of contractors to be carried out, for specified time periods.

Compatible Products

CRC200-S	2 door controller, sequential cards
CRC200-R	2 door controller, random cards
CRC220-48-PLA	2 door controller, RS485 connection
CRC220-TCP-PLA	2 door controller, TCP/IP connection
CRC220-48-ENC	2 door access control unit, RS485 connection. Complete with enclosure & power supply
CRC220-TCP-ENC	2 door access control unit, TCP/IP connection. Complete with enclosure & power supply
CRC220-48-ENC-4	4 door access control unit, RS485 connection. Complete with enclosure & power supply
CRC220-TCP-ENC-4	4 door access control unit, TCP/IP connection. Complete with enclosure & power supply
